STRATTON AND CROUDER'S MANUFACTORY AND WAREHOUSE, NEAR THE MAGDALEN, BLACKFRIARS-ROAD, FOR THE FOLLOWING NEW AND PATENT INVENTIONS.

First, The PATENT ANTIFUELIST SMOAK-JACK, &c.

AMONGST the various Advantages arising from this Invention, is the astonishing saving of Fuel; which, at a Time when Fuel is so extremely expensive, renders it a Matter of great Importance to every Family. — This will be demonstrated from the following Statement. A small Fire, only 12 Inches wide, will roast to the Length of 6 Feet, and the same for Boiling, Broiling, Frying, &c. at the same Time that it heats a large Oven, and performs every Operation, to which the Steam-Kitchen and Economist have ever been applied, by Means of Steam arising from a Boiler, so simply fixed, as to be removed and cleaned at Pleasure. In Fact, a Fire of the above small Dimensions is hereby rendered fully sufficient to dress a Dinner for most Families: And, as a farther Recommendation to Noblemen and large Families, &c. so great will be the Proportion of the Saving of Fuel, that one Fire, only 18 Inches wide and 9 Inches deep, will have all the Advantages of a Kitchen fitted up in the most extensive Manner and with many Fires in the present Mode, and will be fully sufficient to cook a Dinner for 200 to 1000 Persons. Another Advantage is, its Cleanliness, to which is added every Qualification to render it decidedly the most complete Apparatus for a Kitchen of any yet offered to the Public.

For a LAUNDRY, &c.

It possesses every Advantage, a Fire only 12 Inches wide being sufficient to heat Irons and the largest Room, and answers every Purpose to which 2 large Stoves have been applied, and the Heat at any Time regulated at Pleasure, and so perfectly pleasant and cleanly in Effect, that the Linen cannot be blacked or made dusty.

For a CAMP, &c.

It far excels every Invention: Cooking may be performed in the Field or open Air, and are made so portable, that a Machine, with Table and Cooking Apparatus, to dress a Dinner for the most extensive Purpose, may be packed up in 2 Feet 6 Inches square, and unpacked and heated ready for the above extraordinary Purpose in 15 Minutes. The general Satisfaction given to the many Noblemen and Gentlemen who have them in Use, the Number of References, and the great Encouragement and Demand the Patentees have received, may be stated as a farther Recommendation.

The PATENT MAGIC STOVE

Is so simple, that the Fire may be extinguished in an Instant without dust; it is an absolute Remedy to prevent smoky Chimneys, and to this may be added the only certain Preventive of Accidents happening by Fire. Even in Bed-Rooms, if Sickness, a large Fire may be left all Night, or in Rooms without Persons in them, with the greatest Safety.

COPPER UTENSILS for COOKING.

The pernicious Effects experienced in the Use of Copper Kitchen-Furniture have induced many Families to give up the Use of them; and those, from extensive Cooking, who still continue their Use, are ever liable to the most dangerous Consequences. To render cooking in Copper Vessels perfectly wholesome as Silver, STRATTON and CROUDER have to offer to the Public, Copper covered and lined with a patent Metal much harder than the Copper itself, and, from Proof, will last many Years without new covering; and, as a Recommendation to so valuable an Invention, it is the Intention of the Proprietors to cover old Copper Vessels with the same Composition; that those Families, who have already Copper Furniture in Use, may have the Experiment at little more than the present Expenses of tining old Copper.

PATENT ALARUMS, to prevent House-Breaking or Accidents by Fire, &c.

This simple Invention has often been the Means of preventing much Mischief as well as the Loss of Property, as it rarely happens that Houses are entered or broken open but by Persons who are fully acquainted with every Situation of the House intended to be robbed, so that the Alarum will always prove a certain Remedy against these dreadful Calamities.

*** The PATENT ANTIFUELIST and COOKING APPARATUS, together with the Conjurer, may be seen in Use every Day, and Families who have the Steam-Kitchen or Economist may have them exchanged at a small Expense.
